-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 09 February 2004.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 2-5, 7-11 and 13-16 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 2-5, 7-11 and 13-16 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. §§ 119 and 120

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
* See the attached detailed Office action for a list of the certified copies not received.
- 13) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application) since a specific reference was included in the first sentence of the specification or in an Application Data Sheet. 37 CFR 1.78.
a) ☐ The translation of the foreign language provisional application has been received.
- 14) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121 since a specific reference was included in the first sentence of the specification or in an Application Data Sheet. 37 CFR 1.78.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892) 4) ☐ Interview Summary (PTO-413) Paper No(s). _____
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948) 5) ☐ Notice of Informal Patent Application (PTO-152)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449) Paper No(s) _____ 6) ☐ Other: _____

Art Unit: 2674

DETAILED ACTION

1. Applicant's arguments with respect to claims 2-5, 7-11 and 13-16 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2-5, 7-11 and 13-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Berry et al. (USPN 6256030) in view of Cirne et al. (USPN 6633313) and Ono et al. (USPN 5794040).

Regarding claims 2, 7 and 11, Berry teaches event handling system in connection with the user's manipulation of a keyboard that includes event type keyboard (259) and handling keyboard event in object (269). See Fig 7(A-C). Berry teaches navigating between levels of a composite object in graphical user interface in keyboard mode. See col. 2, lines 20-25. Berry teaches that the object can be demonstrated in tree form as shown in Fig 3, Fig 8(A-B) and Fig. 10(A-B). Berry also teaches the use of arrow keys and a tab key for the purpose of navigating from object to object. Col. 8, lines 60-65. Furthermore, Berry teaches that in the in the case of a keyboard event, a consecutive next object is determined according to the compound object's hierarchy that will determine appropriateness for keyboard input (265). See col. 10, lines 32-52.

Art Unit: 2674

However, Berry does not disclose “comparing a keyboard event with keys listed in the key lists with the key list associated with active graphical element”. Cirne on the other hand teaches an event structure (800) including an event data key (802) serving as a unique identifier locating the event data field (804) which in turn specifies extra data specific to a particular type of focus even such as keyboard input for a keyboard event or navigational input for a navigational event. See col. 7, lines 61-67 and Fig. 8.

Therefore, it would have been obvious to one skilled in the art at the time the invention was made to modify Berry’s graphical user interface system to adapt Cirne’s event structure (800). One would have been motivated in view of the suggestion in Cirne that the event structure (800) as configured in Fig. 8 equivalently provides the desired comparison of keyboard events with listed keys. The use of event structure (800) helps function graphical user interfaces as taught by Cirne et al.

Berry does not teach a comparison which involves “traversing the tree of parent graphical elements and child graphical elements toward its root if the keyboard event was not found in the key list associated with the active graphical element.” Ono on the other hand teaches the EventSource computation (computeES) and the Event Source generating an event the example of which is shown on Fig. 10 (a). Ono as shown on Fig. 10 (a) teaches an operation being a Sequence Operation consisting of the system equations such that those system equations are solved bottom-up (from a Primitive Operation to the Root operation of the Operation tree and from the last Child Operation to the First Child Operation col. 9, lines 55-65 and col. 10, lines 1-18.

Art Unit: 2674

Therefore, it would have been obvious to one skilled in the art at the time the invention was made to modify Berry's system of navigating within a composite object to adapt Ono's EventSource computation (computeES) technique. One would have been motivated in view of the suggestion in Ono that EventSource computation (computeES) as shown Fig. 10 equivalently performs "traversing the tree of parent and child elements toward the root". The use of EventSource computation (computeES) helps identify an executable object as taught by Ono.

Regarding claims 3-5 and 8-10, Berry teaches navigation system within a graphic user interface applicable for a variety of computers including a mini computer, under different operating systems.

Regarding claim 13, Berry teaches navigation paths between levels of composite images (col. 2, lines 25-28) and the composite object is treated as a hierarchy structure. (col. 5, lines 1-13). It would have been obvious that navigation of hierarchy structure can parent/child hierarchy.

Regarding claims 14-16, Cirne teaches an event handler retuning to an error code in which case the event manager performs sequential examination in order to determine the registration of the event at issue. See col. 4, lines 49-54.

Conclusion

3. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 2674

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

4. Any inquiry concerning this communication or earlier communication from the examiner should be directed to **Abbas Abdulsalam** whose telephone number is **(703) 305-8591**. The examiner can normally be reached on Monday through Friday (9:00-5:30).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, **Richard Hjerpe**, can be reached at **(703) 305-4709**.

Any response to this action should be mailed to:

Commissioner of patents and Trademarks
Washington, D.C. 20231

or faxed to:

(703) 872-9314

Hand delivered responses should be brought to Crystal Park II, Crystal Drive, Arlington, VA, Sixth Floor (Receptionist).

Art Unit: 2674

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Technology center 2600 customer Service office whose telephone number is (703) 306-0377.
